

# Back quality early childhood education for all tamariki!

**Our youngest learners deserve the best.**

Their early years and education influence the rest of their lives.

Yet right now, the Government is making big changes that put private profit first and lower the quality of early childhood education in Aotearoa.

These include:

- **Cutting pay for new, relieving, and fixed-term teachers.**
- **Loosening teacher qualification requirements.**
- **Scrapping compulsory curriculum standards around good teaching practices.**
- **Removing requirements to honour Te Tiriti o Waitangi.**

It's teachers' qualifications, professionalism, and expertise that make the difference for tamariki.

But to create quality learning conditions for tamariki, teachers need quality working conditions.

Thousands around the motu are calling on the Government to value early childhood education.
